Foreword

Requirements contained in this document apply to grades 1–12 special education in public and separate school boards, including Francophone regional education authorities, but excluding charter schools, in accordance with Ministerial Order 015/2004 and are effective September 1, 2004.

Standards for Special Education, Amended June 2004 supports Alberta Learning's Business Plan goal to have high quality learning opportunities that ensure the learning system meets the needs of all learners and society.

Special education refers to the education of students with mild, moderate, or severe disabilities and those who are gifted and talented. It is founded on the belief that all children can learn and reach their full potential given opportunity, effective teaching and appropriate resources. Instruction, rather than setting, is the key to success and decisions related to the placement of students are best made on an individual basis in a manner that maximizes their opportunity to participate fully in the experience of schooling.

In Alberta, educating students with special education needs in inclusive settings is the first placement option to be considered by school boards in consultation with parents and, when appropriate, students. Inclusion, by definition, refers not merely to setting but to specially designed instruction and support for students with special education needs in regular classrooms and neighbourhood schools.

Rights and responsibilities related to special education are included in the *School Act*. School boards are required to provide each resident and enrolled student with identified special education needs with access to a special education program. Parents have a right and responsibility to work with boards to ensure their children's special education needs are met, subject to limitations based on reasonableness in each circumstance. In every case, the best educational interest of the student is the paramount consideration for decision-making and programming.

Standards for Special Education, Amended June 2004 requires school boards to identify and deliver effective programming for students with special education needs in grades 1–12. It promotes consistent and enhanced quality of educational practice within our province, so that irrespective of location, students with special education needs can access appropriate programming and services. Alberta Learning acknowledges the importance of local autonomy, flexibility and choice in meeting the diverse learning needs of students.

This document outlines the requirements for school boards regarding the delivery of education programming and services to students with special education needs in grades 1–12. These requirements are organized into the following four areas:

- Access — students with special education needs are entitled to have access in a school year to an education program in accordance with the *School Act*. Students with special education needs receive adapted or modified programming that enables and improves learning.
- Appropriateness — educational programming and services are designed around the assessed needs of the student and are provided by qualified staff who are knowledgeable and skilled.
- Accountability — the obligation to answer for the execution of one's assigned responsibilities.
- Appeals — timely, fair and open processes protect the rights of students and parents and address differences of opinion about the education of students with special education needs.
